

parse msg (msg, cmd)

in this scenario the MUA is "smart" and it specifies how the backend is to operate (differently).

An example would be: (cmds)

~~no grab keys~~  
 no grab keys  
 pgp parm = bla

encrypt only  
 encrypt-eng: rgp  
 PSP parm: bla  
 etc

OR

or  
 sign  
 return separate part

sign
